

BIFFI Luce

Product Overview

PENDANTS

A wide variety of attractive luminaires, these pendants utilize energy efficient fluorescent and metal halide lamps. A choice of different wattages from 22W to 4x42W fluorescent and 70W to 250W metal halide, makes these pendants suitable for a variety of spaces and room sizes. With a stylish range to suit every application, these luminaires can be used in function rooms, showrooms, foyers, retail, restaurants, schools, commercial or residential buildings.

SUSPENDED SYSTEMS

These systems are synonymous with a new generation of modern, design-focused, efficient lighting systems. Electronic power supplies turn on quickly without flickering with a pleasant soft start, they are noise-free, any defective lamps are disconnected automatically and the lights have a low operating temperature. All this and a fantastic array of design shapes and elements. Many of these systems are designed to include various integrated spot lights.

SPOTLIGHTS

High light output projectors with maximum light control. Metal halide lamps and electronic gear utilize the most efficient technology in both futuristic and traditional projectors. Additional theatrical style light control available on many versions – barn doors, adjustable cones, anti-glare louvres and wall washer accessories. Track or ceiling mount. Create a powerful image with this extensive range of projectors.

RECESSED LIGHTING

A wide variety of recessed lighting including the flush plaster recessed Dove with versions for corner mounting. Square downlights using up to 2 x 42W compact fluorescent lamps partner with wall wash luminaires that look identical for continuity in the ceiling. Tamper resistant Micros provide peace of mind for security areas. Downlights with IP44 rating back and front to keep those nasty bugs out and the light in are ideal for suspended or acoustic ceiling panels.
